
CROWN MEDIA GROUP PRESENTS

82n0 LIVE

Website Build Blueprint

A faith-driven podcast platform built for autonomy,
automation, and multi-platform content distribution.

BRAND	82n0 Live
NICHE	Faith-Based Podcast Universal Topics
COLORS	Black White Gold
PLATFORMS	YouTube Spotify Apple Facebook
BUILT BY	Crown Media Group — crownmediagroup.co

Proverbs 16:3 — Commit to the LORD whatever you do, and he will establish your plans.

Prepared by Crown Media Group | Columbia, SC | All Glory to Jesus Global LLC

BLUEPRINT CONTENTS

- | | |
|----|--|
| 01 | Platform Decision & Stack Overview |
| 02 | Domain, Hosting & Infrastructure Setup |
| 03 | Brand Assets — Logo, Colors & Identity |
| 04 | Website Architecture & Page Structure |
| 05 | Content Management System (Notion Backend) |
| 06 | Podcast RSS Feed & Apple Podcasts Submission |
| 07 | Multi-Platform Distribution Automation |
| 08 | Mobile App Access (iPhone & Android) |
| 09 | Dropbox Content Flow System |
| 10 | Go-Live Checklist & Launch Protocol |

WHY NOT WORDPRESS

WordPress is powerful but requires a developer every time G wants to upload an episode or update a page. It breaks with plugin updates, requires maintenance, and has too high a learning curve for 20-minute self-serve edits. G needs a platform he can manage from his phone, in under 20 minutes, without touching code.

RECOMMENDED STACK

LAYER	TOOL	PURPOSE	COST
Frontend	Framer	Public website — auto-updates when content changes	Free / \$19mo
Backend CMS	Notion	G uploads all content here — no code	Free
Podcast Host	Buzzsprout	RSS feed generator — required for Apple Podcasts	\$12/mo
Automation	n8n / Zapier	Pushes content to all platforms automatically	\$0–20/mo
File Storage	Google Drive	Master dropbox for raw episode files	Free
Email/Contact	Beehiiv or Resend	Newsletter / contact form handling	Free tier

★ Framer connects directly to Notion. When G adds a new episode row in Notion, the website updates automatically with zero code. Framer has a native iOS/Android app and a web editor — G can make changes from anywhere.

PHASE 2

DOMAIN, HOSTING & INFRASTRUCTURE SETUP

01

Purchase Domain

82nolive.com (or .co / .fm for podcast branding)

Estimated Time:

Namecheap / GoDaddy — ~\$12/yr

02

Create Framer Account

framer.com — sign up with Google account

Estimated Time:

Free to start

03

Connect Domain to Framer

Framer Settings > Domain > Add Custom Domain

Estimated Time:

~10 min

04

Create Notion Workspace

notion.so — create free workspace named "82n0 Live CMS"

Estimated Time:

Free

05

Install Framer-Notion Plugin

Inside Framer: Plugins > Notion CMS > Connect workspace

Estimated Time:

~5 min

06

SSL Certificate

Framer handles this automatically — HTTPS out of the box

Estimated Time:

Included

COLOR SYSTEM

COLOR	HEX CODE	USAGE
Primary Black	#0A0A0A	Backgrounds, dark sections
Pure White	#FFFFFF	Text, cards, contrast elements
Gold Accent	#C9A84C	CTAs, highlights, logo accent, dividers
Gold Light	#E5C97A	Hover states, secondary gold elements
Off-White	#F5F0E8	Body text on dark backgrounds

REQUIRED BRAND ASSETS (BUILD ORDER)

01	Primary Logo Black bg version + White bg version + Transparent PNG	Canva or Adobe
02	Podcast Cover Art 3000x3000px — required by Apple Podcasts spec	Canva template
03	Website Favicon 32x32 and 180x180 versions of logo mark	Export from logo
04	Episode Thumbnail Template 1280x720 — Canva template G fills in for each episode	Canva
05	Social Profile Headers YouTube banner 2560x1440 + Facebook cover 820x312	Canva
06	Guest Bio Card Template Canva template — photo + name + title overlay	Canva

HOME /

- Hero section: 82n0 LIVE logo + latest episode CTA
 - Latest episode embed (auto-updates from Buzzsprout)
 - Mission statement: "Faith conversations with every walk of life"
 - Platform links: Spotify, Apple, YouTube, Facebook
 - Email capture: "Never miss an episode"
-

EPISODES /[/episodes](#)

- Auto-grid pulling from Notion CMS database
 - Each card: thumbnail, title, guest name, date, listen button
 - Filter by topic or guest (optional Phase 2)
 - Pagination — latest 12 per page
-

GUESTS /[/guests](#)

- Guest bio cards — photo, name, title, episode link
 - Pulls from Notion "Guests" database G maintains
 - Search by name (Framer native)
-

ABOUT /[/about](#)

- Host bio + mission statement
 - Show origin story
 - Scripture anchor
 - Booking inquiry form for guest applications
-

LISTEN /[/listen](#)

- All platform links in one place
 - Embedded Spotify / Apple player
 - Direct RSS feed link for power users
-

CONTACT /[/contact](#)

- Simple form: Name, Email, Message, Subject
 - Business inquiry option for partnerships
 - Social links
-

Notion is G's control panel. Everything he needs to update the site — episodes, guests, announcements — lives in Notion databases. No code. No developer. Works from phone or desktop.

NOTION DATABASE STRUCTURE

DATABASE: Episodes

Title	Guest Name	Date
Description	YouTube URL	Spotify URL
Thumbnail (image)	Status (Draft/Live)	Tags

DATABASE: Guests

Name	Title / Role	Bio (text)
Photo (image)	Episode (relation)	Social Links
Website		

DATABASE: Announcements

Title	Body Text	Date
Active? (checkbox)	Link (optional)	

★ G's workflow: Open Notion app on iPhone → Add new row to Episodes database → Fill in title, guest, paste YouTube/Spotify links → Upload thumbnail → Set Status to "Live" → Site updates within minutes via Framer sync.

Apple Podcasts requires a valid RSS feed. Buzzsprout generates and maintains this feed automatically. Once submitted, every new episode G uploads appears on Apple Podcasts within 24 hours — no manual action.

01

Create Buzzsprout Account

buzzsprout.com — use 82n0 Live as show name

02

Upload Existing Episodes

Upload MP3s + add titles, descriptions, artwork

03

Verify Podcast Cover Art

Must be 3000x3000px, JPG or PNG, under 500KB

04

Copy RSS Feed URL

Buzzsprout > Directories tab > Copy RSS URL

05

Submit to Apple Podcasts

podcastsconnect.apple.com → Add Show → Paste RSS URL

06

Submit to Spotify

podcasters.spotify.com → Add Podcast → Paste RSS URL

07

Submit to Google Podcasts

Via Buzzsprout Directories tab — one click

08

Embed Player on Website

Buzzsprout embed code → paste into Framer homepage

★ Apple Podcasts review takes 3–5 business days on first submission. Submit early. Spotify is usually live within 24 hours.

G records once. The automation pushes content everywhere. Built with n8n (or Zapier for non-technical setup). This is the system that saves G 5+ hours per week.

AUTOMATION FLOW — EPISODE RELEASE

TRIGGER	ACTION	DESTINATION
G uploads to Google Drive folder	n8n detects new file	Trigger fires
Buzzsprout API — new episode published	n8n pulls episode data	All platforms
n8n formats post for Facebook	Auto-post with thumbnail + link	Facebook Page
n8n generates YouTube description	Uploads to YouTube (if not already live)	YouTube Channel
n8n sends email blast	Notifies Beehiiv subscriber list	Email list
Notion row Status = "Live"	Framer site auto-syncs	Website Episodes page

WHAT G DOES MANUALLY (THE ONLY MANUAL STEPS)

- ☐ Record the episode
- ☐ Upload raw audio to Google Drive folder
- ☐ Add episode row to Notion (title, guest, links)
- ☐ Set Status to Live
- ☐ Everything else is automated

G can manage everything from his phone. Here are the exact apps to install and what each does.

APP	PURPOSE	WHAT G DOES	COST
Notion	CMS / Content Updates	Upload episodes, update guests, manage announcements	App Store + Google Play — Free
Framer	Website Editor	Quick design edits, layout changes, page updates	App Store — Free
Buzzsprout	Podcast Management	Upload episodes, monitor stats, manage RSS feed	App Store + Google Play — Free
Google Drive	File Dropbox	Upload raw audio/video files to trigger automation	App Store + Google Play — Free
YouTube Studio	Video Management	Upload episodes, edit titles, check analytics	App Store + Google Play — Free
Canva	Graphic Creation	Create thumbnails, guest cards on mobile	App Store + Google Play — Free

The Dropbox system is G's content inbox. Every piece of content flows through here. This is the nerve center of the entire operation.

GOOGLE DRIVE FOLDER STRUCTURE

■ ■ 82n0 Live — MASTER	Root folder — everything lives here
■ ■ 01 — Raw Recordings	G drops raw audio/video files here after recording
■ ■ 02 — Edited Episodes	Edited final MP3/MP4 ready for upload
■ ■ 03 — Thumbnails	Episode artwork and guest cards
■ ■ 04 — Guest Assets	Guest photos, bios, headshots
■ ■ 05 — Published Archive	Completed episodes — auto-moved by n8n
■ ■ 06 — Branding	Logos, color codes, font files, templates
■ ■ 07 — Show Notes	Text files for episode descriptions

HOW THE FLOW WORKS

RECORD	G records episode with guest
EDIT	Editor (or G) finalizes audio/video
DROP	G drops final file into "02 — Edited Episodes" folder
TRIGGER	n8n detects new file → automation fires
DISTRIBUTE	Buzzsprout upload + Facebook post + email blast + Notion update
LIVE	Episode is live on all platforms within 30 minutes

INFRASTRUCTURE

- ☐ Domain purchased and connected to Framer
- ☐ Framer site live with custom domain
- ☐ SSL certificate active (https://)
- ☐ Notion workspace created and connected to Framer

BRAND ASSETS

- ☐ Primary logo finalized — 3 versions (black/white/transparent)
- ☐ Podcast cover art created — 3000x3000px
- ☐ Episode thumbnail Canva template built
- ☐ YouTube banner and Facebook header complete

CONTENT

- ☐ Existing episodes uploaded to Buzzsprout with titles + descriptions
- ☐ Notion Episodes database populated with existing episodes
- ☐ Guests database populated for existing guests
- ☐ About page copy written and published

PLATFORMS

- ☐ Buzzsprout RSS feed live and verified
- ☐ Apple Podcasts submission submitted (3-5 day review)
- ☐ Spotify for Podcasters connected to RSS feed
- ☐ YouTube channel linked and playlists organized
- ☐ Facebook Page updated with new branding

AUTOMATION

- ☐ Google Drive folder structure created
- ☐ n8n automation workflow built and tested
- ☐ Test episode run through full automation — verified

☐ Email notification to list on new episode confirmed working

MOBILE

☐ Notion app installed on G's phone

☐ Google Drive app installed on G's phone

☐ Buzzsprout app installed on G's phone

☐ G trained on episode upload workflow — under 20 min confirmed

LAUNCH

☐ Soft launch to close circle for feedback

☐ Full public launch post across all platforms

☐ First new episode recorded and pushed through full system

☐ Analytics baseline set — YouTube, Spotify, Buzzsprout
